WATER, WATER EVERYWHERE

Worksheet 1a
Little Duck lives near a stream far from the ocean. He is hungry, very hungry and is looking for some food. Let’s see what he can find for dinner!

Little Duck swims to where the stream gets bigger. He sees rocks and grass. Which do you think he will eat?
Little Duck swims down the stream to the river. He swims and swims. He is hungry. Where is some food?

Little Duck finds some yummy little fish to eat.
The river gets bigger and bigger. Little Duck swims to Baltimore to visit his friends. Wow! Can they find some food here?

Little Duck’s friends say, “Let’s follow the river to the Chesapeake Bay. We can find some big fish there.”
Little Duck and his friends follow the river out to the bay. Is there food in the bay? Are there any fish in the bay?

At last they see the Ocean! Will they find food in this BIG Ocean?
Finally, Little Duck and his friends find some delicious food! They find fish that are just the right size, not too little and not too big.

Now, it is time to go home. But they are lost in the big ocean. Can you help them?
Worksheet 2b

Help Little Duck and his friends find their way home.
Put the pictures in order so that Little Duck knows what to look for as he returns home.
| stream | river |
|----------------|
| bay  | ocean |
Suggestions/ideas:

Explanation: **Introduce a story to show students how water flows from stream to ocean**

Teacher can put blue construction paper, representing bodies of water, on the floor, and ask students to show Little Duck’s trip.
Worksheet 3a
Illustrating sunny, rainy, cloudy, snowy

Photos from [http://www.publicdomainpictures.net](http://www.publicdomainpictures.net)
Worksheet 3b
Illustrating Cold and Hot

Photos from http://www.publicdomainpictures.net
Teacher reads the statement and has students point to a section of the picture, naming the part of the water cycle, such as: water, cloud, snow, rain, etc.

The teacher could also state:
- The water goes up.
- This is a cloud.
- It is cold. This is snow.
- The snow/rain falls from the cloud.
- The sun comes out and dries up all the rain/snow.
WATER, WATER EVERYWHERE

Worksheet 4a
WATER, WATER EVERYWHERE

Worksheet 4b

1. Solid
2. Liquid
3. Gas
Worksheet 5a
Paste a picture in the block to show the state of water that goes with each thermometer.
