Criteria for Identifying Students with Disabilities for Participation In a Mod-HSA

A student who would be eligible for the Mod-HSA would be identified based on his/her individual evaluation information and the instructional and service information on his/her IEP. The student would be identified as appropriate for instruction and assessment using course level academic content standards and modified academic achievement standards aligned with the Algebra/Data Analysis, Biology, English and/or Government. Students pursuing the Mod HSA are not precluded from completing the requirements for the regular high school diploma. The student would have been identified as meeting each of the following criteria:

- The student learning is based on the State’s Academic Content Standards/Core Learning Goals in the appropriate content area being considered: Algebra/data Analysis, Biology, English and/or Government. There must be sufficient objective evidence demonstrating that the student is not likely to achieve proficiency within the school year covered by his/her IEP.

  AND

- The student requires and receives modified academic achievement standards aligned with the Maryland Academic Content Standards/Core Learning Goals in the relevant content area(s) for the student’s grade level during instruction and assessment. In addition, specific accommodations implemented in these instructional and assessment settings may include: less complex, fewer and shorter reading passages, shorter or less difficult questions, and test items with fewer answer choices.

  AND

- The student has had consecutive years of individualized intensive academic instruction intervention in the relevant content area(s) consistent with his/her IEP, and although progress towards grade-level standards was made, he/she is not making progress at grade-level.

  AND

- The student must demonstrate that he/she cannot attain proficiency on the Algebra/Data Analysis, Biology, English and/or Government HSA, even with the provision of accommodations based on documented multiple valid and objective measures of student’s progress (or lack of progress). Examples include the end-of-course assessments, district-wide assessments, data gathered from classroom assessments, and other formative assessments that can validate documented academic achievement in response to appropriate instruction. There must be enough time to document the progress (or lack of progress) in response to appropriate instruction.
