

COMMON TOXIC PLANTS

The following is a list of toxic plants often found in homes or backyards that should be removed or kept out of children's reach. However, it is not a complete list of all poisonous plants. If you are unsure whether a plant in your home or yard may be poisonous, you should call the **Maryland Poison Control Center at 1-800-222-1222** for information about the plant.

NOTE: The following plants are listed by their most common names. Several of these plants are also often known by other names, which are italicized and shown in parentheses.
