

## 2017 Technology Education Professional Development Opportunities

Listed below are some professional learning opportunities available during the summer of 2017 to support specific technology education courses. Most of these opportunities require school or district partnerships and additional follow up experiences, either online or in person, during the school year. This list does not encompass the total breadth of technology education professional learning opportunities. Local school system central office staff should review professional learning opportunities in depth to determine those that would best fulfill the needs of their school system.
