DO YOU HAVE CONCERNS?

Visit https://referral.mditp.org to learn what is typical development for young children and see if your child's growth and development are on target for her age. If you have concerns, don't hesitate to speak with your child's health care provider and/or an early care and education provider and make a referral.

NEXT STEPS

1. Check out https://referral.mditp.org to learn more information and to complete an online referral. You can also call 800-535-0132 to get contact information for your local Infants and Toddlers Program.

2. You will want to share information about your concerns and priorities when you speak with your local Infants and Toddlers Program. Next steps will include planning for developmental screening and/or evaluation to help determine if your child is eligible for services.

3. If your child is eligible, you will become a part of the early intervention team. Together you will develop a plan for supports and services. These will be provided at no cost and in familiar places where your child learns and plays, such as your home, child care center, the park, or the library.

Anyone can complete a referral to the Maryland Infants and Toddlers Program for children younger than 36 months who live in Maryland.

The Maryland Infants and Toddlers Program supports young children with developmental delays or disabilities and their families.
The goals of early intervention are:
- To enable young children to be active and successful participants during their early childhood years and in the future in a variety of settings: in their homes, in child care or preschool programs, and in their communities; and
- To enable families to provide care for their children and have the resources they need to participate in their own desired family and community activities.

The outcomes for all children participating in the Maryland Infants and Toddlers Program are to:
- Develop positive social-emotional skills and relationships,
- Acquire and use knowledge and skills, and
- Use appropriate behaviors to meet their needs.

Families benefit from early intervention by being better able to meet their child’s special needs from an early age and throughout their lives.
