SUBJECT: Digital Learning Workgroup Report

PURPOSE:
To provide an overview of the work that was conducted over the past eleven months related to student online learning opportunities and future possibilities in Maryland.

HISTORICAL BACKGROUND
Supported by grant funding, MSDE’s Virtual Online Program was developed and implemented in 2004. Legislation and regulations in 2012 and 2013 supported the expansion of the program. To provide flexibility for and meet the needs of Maryland students, instructional delivery modalities have been implemented that include online, blended, and broadcast opportunities. With the addition of an Accessibility Specialist, MSDE is able to review digital resources submitted for approval.

EXECUTIVE SUMMARY:
The Digital Learning workgroup examined many aspects of online learning. An in-depth examination of current state and local online programs and a study of national efforts were conducted. The findings are prepared for the Maryland State Board of Education.

ADDITIONAL RESOURCES: https://msde.blackboard.com

ACTION:
The workgroup is seeking input from the Board of Education related to the future direction of online learning.

Definitions
Online Learning

**Definition:** 80 percent or more of the instruction is conducted online, the teacher and student are separated by distance or time or both, and two-way communication is required between teacher and student.
Blended Learning

Definition: Less than 80 percent of the instruction is conducted online. Such a course is also referred to as a “blended” or “hybrid course.”
Virtual School

Definition: “Virtual school” means a public school established by the Department or by a county board under § 4-109 of this article in which the school uses technology to deliver a significant portion of instruction to its students via the Internet in a virtual or remote setting.

MD Educ Code § 7-1401 (2013)
Broadcast Learning

**Definition:** Synchronous instruction from a facilitator in one location to students in multiple other locations through the use of web conferencing software and other digital resources.
Broadcast - Satellite Scenarios
(Scenarios are Equipment and Bandwidth Dependent)

**Group** - 4 or more students

**Individual** - 1-3 students
Observations
Support Existed for Developing Student Skills in Digital Learning

The Maryland Advisory Council for Virtual Learning was established in 2012 by legislation (Section 7–10B–01 through 7–10B–06 “Maryland Advisory Council for Virtual Learning” Annotated Code of Maryland), to address online learning in Maryland.

- In response to a 2013 proposed legislation, that would require the completion of an online course for graduation, the Council investigated implications and sent the Governor a Feasibility Report.

Feasibility Study Summary:

- Council recognized the necessity and value of integrating digital experiences into teaching and learning for all students as they prepare for college and career;

- Using LSS input, it was determined that student participation in an online course could serve as one option from a menu of online learning experiences; and,

- Overwhelmingly, feedback indicated that limiting online experiences to a traditional online course as a graduation requirement may not provide the level of constancy nor the depth and richness for learning that on-going access to online experiences would.
Online and Blended utilization in Maryland is uneven and presents an opportunity for growth

- **Total content areas** represented on approved course list – 201
- **Total number of courses offered** – 392 (one course may have multiple providers)
- **High School** – Approximately 260,000 enrolled (2017)

**Online Courses** – Approx. 5000 (2%) (includes 670 for credit recovery)

Cost is an obstacle to use. Maryland’s courses are favorably priced versus vendor courses but development is limited by the available resources and budget.

- **11 vendors** – Average cost per student semester = $350
- **MSDE** – Average cost per student per semester = $250
  (If LSS supplies a qualified facilitator, the cost of a course is $25)
- **MSDE Review Charge** is $430- $1400 and is mandated by Statute; however, this doesn’t compensate time and effort to review a course
  - Demand for course review is increasing
  - Vendor accessibility compliance is inadequate
Broadcast Learning Shows Growth but is Underutilized

Enrollments as reported to MSDE by LSSs:
- SY17-18: 551 enrollments (across 7 LSSs)
- SY18-19: 732 enrollments (across 7 LSSs - 2 different LSSs than SY 17-18 and 5 remained the same)
- Broadcast learning is utilized as a solution when needed and can cross LSS lines

Obstacles to Growth:
- Equipment, LSS Awareness, Scheduling, Educator training and capacity

Broadcast Learning is currently used by:
- Various contents and grade levels
- Gifted and Talented Education
- Career and Technology Education programs
- Home and Hospital
Pathway Available for Virtual Schools in Maryland

State provides a pathway for LSSs to request a Virtual School
  •  An application process, based on existing regulations, has been established
  •  Requires State Superintendent approval

Knowledge gained from presentations and research:
1. Research suggests – move cautiously and go slow
2. Be mindful of successful student profiles
3. Learn from best practices provided by other states
4. Funding must be provided to establish and maintain a Virtual School
5. Conduct a thorough evaluation to ensure high-quality, accessible online content that aligns with content standards and assessments
In SY17-18 Maryland improved student access for students with medical conditions through a grant

**Purpose:** To provide grants to public schools to purchase technology to allow students with medical conditions to participate in classrooms remotely (Peyton’s Bill, Article – Education 12 Section 7-124 13 Annotated Code of Maryland)

**SY17-18** – All 24 local school systems and Maryland School for the Deaf received $15,000.00 to provide a distance learning solution to home/hospital students.

Maryland Staffing and Support is Varied and Offers an Opportunity for Optimization

**System:** While there is an MSDE Digital Learning contact in each LSS, the total staff is variable and reflects the LSS philosophy and engagement in online learning.

**School & System:** Personnel is driven by the vision of local leadership.

**School:** Options include dedicated personnel as well as personnel with assigned duties. This is dependent upon the size of the school and online engagement.

Chapter 15 Digital Learning

Authority: Education Article, §§2-205 and 7-1002, Annotated Code of Maryland

.01 Purpose.

Digital learning encompasses a wide spectrum of tools and practices that support teaching and learning for students and educators. This chapter defines online and blended courses and establishes requirements for such courses to be offered to students for credit. Processes for the approval of online credit bearing student courses and professional development courses are addressed. These processes include the setting of a vendor fee structure for reviewing and approving courses.

.02 Definitions.

A. In this chapter, the following terms have the meaning indicated.

B. Terms Defined.

(1) “Accessible” means fully and equally accessible for independent use by individuals with disabilities to online course content, materials, and features.

(2) “Blended course” means one in which less than 80 percent of the instruction is conducted online. Such a course is also referred to as a “hybrid course.”

(3) “Digital learning” means any instructional practice that effectively uses Internet-related technology to strengthen the student and/or educator learning experience.

(4) “Online course” means an Internet-based course in which 80 percent or more of the instruction is conducted online, the teacher and student are separated by distance or time or both, and two-way communication is required between teacher and student.
