2 Teachers' Salaries Indexed to Region.....	9

Introduction

The tables in this report were prepared from the data submitted by the 24 Maryland public school systems in the fall of 2011. Salaries include annual pay for 10, 11, and 12 month full-time and part-time employees in the positions shown. All data reported reflect the conversion of part-time employees to full-time equivalents.

Calculations

The average (mean) salaries are computed by dividing the sum of the individuals' salaries by the sum of the full-time-equivalent positions. The value of the means may be distorted by extremely high or low salaries in the distribution and so may not provide an accurate estimate of population averages. Therefore, medians (middle values) are also provided as estimates of typical salaries. The median represents the salary that divides the group in half. The first and third quartiles are provided as an estimation of the distribution of salaries across groups. Quartiles represent a division point similar to the median. The first quartile indicates the salary below which twenty-five percent of salaries fall while the third quartile represents the point above which twenty-five percent of salaries fall.
