**TO:** Members of the State Board of Education

**FROM:** Karen B. Salmon, Ph.D.

**DATE:** December 5, 2017

**SUBJECT:** Overview of the Grants Process

---

**PURPOSE:**

The purpose of this item is to provide an overview of the Maryland State Department of Education's (MSDE) grants process, State and Federal.

**BACKGROUND:**

The Maryland State Department of Education (MSDE) administers grant funds from both the State of Maryland and the Federal government. The information on how the MSDE identifies grant opportunities and manages grant funds is a follow-up to the October 24, 2017 State Board meeting.

**EXECUTIVE SUMMARY:**

Most Federal grants are distributed to states by formula. The amount of funding is determined by population, demographics, and other factors. The MSDE disburses pass-through funds to local education agencies (LEAs) and monitors the implementation of grant funded activities. The subgrants may be awarded to LEAs by formula or awarded through a competitive subgrant process to LEAs and to nonprofit organizations. Some Federal grants are discretionary. These grants are awarded to States through a competitive process. The MSDE has established processes for identification of discretionary grants, development of proposals, protocols to identify who receives the grants, and monitoring of subgrantees.

For both formula and discretionary grants, the MSDE is responsible for ensuring that the Federal requirements are met. The Federal grant program may allow the State to add requirements or identify priorities for spending within the federal parameters.

The Maryland General Assembly and the Governor create State-funded grant programs through legislation or in the Governor's budget. The MSDE awards subgrants to LEAs and nonprofit organizations through formula or a competitive process.

**ACTION:**

For information and discussion only.
